

FEATURES OF THE SWIMEX 500S PADDLEWHEEL AND ORIGINAL ENDLESS POOL

Feature	SwimEx	Endless Pools
Propulsion system	Efficient industrial-grade electric motor.	Hydraulic motor.
5-7 year motor replacement	Not needed.	\$1000 additional cost without installation costs.
Vinyl liner replacement	No liner to replace.	About \$800 without installation costs.
Assembly of steel panels, installation of vinyl liner, installation of plumbing fixtures to pool sidewall	One piece fiberglass construction.	Additional cost.
Coping border around the pool	Included (fiberglass).	Additional synthetic coping cost, additional aluminum coping cost.
Ability to monitor, measure, and repeat water flow	Yes, 99 water speed settings.	Yes.
Construction	Marine grade fiberglass with a balsa wood core and gel coat finish. The wood core adds strength and insulation.	Galvanized steel panels with vinyl liner.
Free standing, self-supporting	Yes.	No.
Color options	Standard color is white; many gel coat colors are available. Customers may also choose from hundreds of colored waterline tiles to coordinate decor.	Vinyl comes in 3 liner choices with 4 patterns and does offer waterline color tiles. Vinyl liners will need replacement.
Installation	One-piece seamless design pools (no assembly required). Pools can be manufactured in 4-piece designs allowing for easy access into existing locations.	Endless Pools steel panels arrive in "kit" form and are assembled on site.
Site requirements	12' wide by 20' long (1.82m x 6m) for the standard size pool.	2' wide x 18' long (1.82m x 5.48m) for standard size pool.
Warranties	10 year structural / 5 year surface / 2 year motor.	10 year structural, 2 year limited moving parts. * As stated in Endless Pools literature, the submersed hydraulic motor should be changed every 5-7 years.
