

SwimEx Commercial Therapy Pools vs the Competition

Feature	SwimEx	Competitor
Propulsion system	<p>Our unique paddlewheel provides a gentle, smooth water current that is the widest and deepest available.</p> <p>Our propeller model (Triton) provides a smooth, consistent water flow focused in the center of the pool.</p> <p>Both types are fully adjustable with 99 speed settings.</p> <p>Any client can be challenged against the current – from a professional athlete to a frail patient working on balance training.</p>	<p>Directional swim jets provide a narrow, turbulent resistance that dissipates the further back in the pool you go.</p> <p>Many frail or acute patients find jets too strong or unpleasant.</p> <p>Jets also do not offer a wide range of water current speeds.</p>
Construction	Structural fiberglass shell, with ¾" balsa wood core for optimal heat retention, freestanding for installation flexibility, smooth gelcoat interior, which is easy to clean and there are no liners to replace.	Metal panels with a vinyl liner similar to an above-ground outdoor pool, or 1-piece acrylic shell. Vinyl liners eventually require paid replacement.
Customizable layout	Yes (all models).	Yes (some models).
Treadmill	Yes – up to 2 treadmills are available in a standard layout. If extensions are added, then up to 4 total treadmills are available.	Up to 2 treadmills available.
Moveable platform	Moveable platform available in several pool models. Allows for zero entry and an additional workspace at any depth. Doesn't interfere with other athletes/patients who are also working in the pool.	Moveable floor available in only 2 models. Moveable floor dictates that all patients need to be working at the same water depth and the same speed.
Warranty	10 years structural, 5 years surface, 1 year motor.	5 years structural, 1 year movable parts.
Integrated treadmill warranty	2 years.	1 year movable parts.
Stairs	Yes.	Yes (some models).
Treat multiple clients	Yes, many of our commercial therapy pools provide the ability to treat multiple clients, at different depths, simultaneously.	Yes (one model).

Feature	SwimEx	Competitor
Monitor, measure & repeat water flow	Yes, water flow measurement provided by EDGE touch screen monitor.	No.
Monitor, measure & repeat treadmill speed	Yes, treadmill speed measurement provided by EDGE touch screen monitor.	Yes.
Factory-trained, certified installers	Yes.	Yes.
Multiple sections model	Yes.	Yes.
Free-standing, self-supporting	Yes.	No.
Industrial grade, high-performance motor	Yes.	No.
Water speeds	Over 20,000 gallons per minute (75,708 liters per minute).	Up to 1,000 GPM (3,785 LPM).
Durability	Pools still running after 30+ years.	Unknown.
In-house customer service	Yes.	Unknown.
In-house design support	Yes.	Unknown.
Women-owned small business (WOSB)	Yes!	No.
